HTML Lab Question:

1. Title: *Online Bookstore Web Page*

Objective:
Create a **multi-section HTML webpage** for an online bookstore using only **basic HTML tags** like
`<html>`, `<head>`, `<title>`, `<body>`, `<h1>`–`<h6>`, `<p>`, `<img>`, `<table>`, `<ul>`, `<ol>`,
`<a>`, `<form>`, `<input>`, `<textarea>`, `<select>`, `<option>`, `<iframe>`, etc.

Instructions:

1. **Page Title & Heading**

   - Set the title as `"BookWorld - Your Online Bookstore"`.

   - Use `<h1>` for the main heading.

2. **Banner Image & Description**

   - Display a banner image of books.

   - Write a short paragraph describing the bookstore.

3. **Book Categories Table**

   - Create a table with columns: **Category**, **Number of Books**, **Top Author**.

   - Use table border and proper alignment.

4. **Best-Sellers List**

   - Create an ordered list of 5 best-selling books.

   - Create an unordered list of 5 upcoming book releases.

5. **Book Preview**

   - Embed a book preview video using `<iframe>` from YouTube.

6. **Registration Form**

   - Create a form with:

     - Name (text)

     - Email (email input type)

     - Favorite Genre (dropdown menu)

     - Comments (textarea)

     - Submit button

7. **Links Section**

   - Add at least 3 hyperlinks to external book-related websites.

   - Add one link that opens in a new tab.

8. **Contact Info**

    - Provide bookstore address, phone number, and email using basic HTML formatting.

Expected Output:

A single HTML page for an online bookstore that combines **headings, paragraphs, images, tables, lists, forms, iframes, and links** in a clean layout.

Welcome to BookWorld

BookWorld is a premier online bookstore. There's a penendium of a wise range of gentes sil need to derive generous seasment, and secure shopping ex-

Book Categories

2.

Lab Task

You are to design an **"Online Conference Registration Form"** with the following requirements:

1. Form Setup

- Use `<form>` with `action`, `method="post"`, and `enctype="multipart/form-data"`.

- The form should be divided into **three sections**:

  1. **Personal Information**
  2. **Account Preferences**
  3. **Payment Details**

2. Personal Information

- Fields:

  - **Full Name** (`<input type="text">`)

  - **Email Address** (classic `type="text"` with a note like *"format: user@example.com"* instead of HTML5 `type="email"`)

  - **Gender** (`<input type="radio">`)

  - **Country** (`<select>` with at least 5 countries)

  - **Profile Photo Upload** (`<input type="file">`)

- All required fields should use the `required` effect **without** HTML5 `required` attribute (instead, write validation instructions and rely on JavaScript).

3. Account Preferences

- Fields:

  - **Username** (`<input type="text">`)

  - **Password** (`<input type="password">`)

  - **Confirm Password** (`<input type="password">`)

  - **Interests** (`<input type="checkbox">` list — e.g., Web Development, AI, Cloud, etc.)

  - **Preferred Contact Method** (`<select>` or radio buttons)

  - Add a **textarea** for "Special Requirements / Comments".

4. Payment Details

- Fields:

    - **Payment Method** (`<select>` with Credit Card, Debit Card, PayPal)

    - **Card Number** (`<input type="text">`)

    - **Expiry Date** (Use 2 `<select>` dropdowns for Month and Year)

    - **CVV** (`<input type="password">` with size=3)

- Include a **"Terms & Conditions"** checkbox.

5. Form Controls

- **Submit** and **Reset** buttons at the end.

- Align form using a table-based layout (since CSS grid/flexbox was not common pre-HTML5).

- Apply **inline CSS** for basic styling.
